

Look into the future ... To a post-carbon future, when we are running out of petrol, gas and coal and facing the consequences of global warming.

It may be sooner than you think!

PostCarbon

HOW will we grow and distribute food? Think about food packaging, refrigeration, diesel for tractors, oil/gas for pesticides and fertilisers.

HOW will we light our homes at night?

WHERE will we work, & what work will we do? How will money work? Will our economy expand or contract?

HOW will we power our homes, offices, schools & hospitals in a post-carbon future?

WHERE will we go on holiday?

WHAT will our lives be like, what will our hobbies be like, what games will we play, what clubs will we join, what pastimes will we take up, where will we shop, what will be on TV, how will we keep fit ...

ecobuzz.org.uk

You may get ideas from the exhibition in The Environment Centre: it shows why there is a need for the Copenhagen Conference – about the future of our planet.

the task

Make a display or a model - or both - to promote your idea. The best will be displayed at The Environment Centre.

Judges will be looking for ideas that cut carbon usage significantly. Extra points will be given for making your idea relevant to High Wycombe or the village or town where you live. (*Think Global – ACT LOCAL!*)

The competition is open to pupils from both primary and secondary schools, university students, students of The University of the Third Age, and everyone!

Bring your entries to The Environment Centre by **February 22nd 2010**. Your exhibition opens on February 27th. The formal opening will be when our guest celebrity presents the prizes. There are prizes donated by local companies. The number of prizes is growing, and they will be published after Christmas.
