

Energy Group

Expected: Spencer, Julian, Frances, Paul, Elsa & Ellen maybe

An informal chat for one-and-a-half hours from 7pm to 8.30pm at the EC on Friday 12th June.

- Presentation - Spencer and Financing schemes.
- Formation of Microgeneration Club/Home Energy Club/Renewable Energy Club for the Town as part of the Post-Carbon Homes Initiative. For people who already have Renewable Technologies or those who are interested in getting them installed. If we can get enough people on board then we could always try to see if we can get a discount.
- A "Renewable Energy Roadshow" for our local schools too. Kids love gadgets and it is a great way to get them talking about our energy (and food) future.... A presentation on low-energy and renewable gadgets that would interest children - this might allow us to present our work to schools.
- Solar Hot Water Club @ Transition Maidenhead - Emily Tomalin who trained at CAT could come and speak (originally a wind engineer).
- Directory of local Firewood suppliers & Trees Exhibit
- Skyblue energy
- Plan for Lido
- Highworth Combined School's Environment Day - Wed 24th June
- 'Creating a Sustainable Wycombe 2026' Conference on Tuesday 7 July 2009 to be held at the Town Hall, High Wycombe.

Mark to take minutes but the discussion will be informal - really a first chance for us to think about our aspirations for the group and hear Spencer's financing ideas.
